EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Himanshu Amin on 4/28/2005.

The application has been amended as follows:

1. (Currently Amended) A computer implemented system for servicing a client request comprising:
 - at least one string template page having at least one text constant; and
 - an executable component operable for receiving the request and executing code corresponding to the request, the executable component retrieving the at least one text constant and inserting at least one variable argument result corresponding to the request into the at least one text constant and passing the at least one text constant and variable argument result to the client; and
 - a monitoring system for informing the executable component of any changes occurring in the at least one string template page, the executable component being adapted to reload, parse and store the changed at least one string template page upon being informed of any changes by the monitoring system.

Art Unit: 2624

27. (Currently Amended) A computer readable medium having computer-executable components comprising;

a first component operable for receiving a request from a client and executing code corresponding to the request, the first component retrieving at least one text constant residing in a memory corresponding to the request and passing the at least one text constant to the client; and

a second component adapted to monitor any changes in at least one string template page and inform the first component of any changes in the at least one string template page, the first component being adapted to reload, parse and store the changed at least one string template upon being informed of any changes by second component.

31. (Cancelled)

2. The following is an examiner's statement of reasons for allowance: The cited prior art fails to teach the claimed invention alone or in a combination.

Specifically the cited prior art fails to teach a monitoring system for informing the executable component of any changes occurring in the at least one string template page, the executable component being adapted to reload, parse and store the changed at least one string template page upon being informed of any changes by the monitoring system as claimed. Therefore the invention as claimed is allowable over the cited prior art.

Art Unit: 2624

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanjiv D. Shah whose telephone number is (571) 272-4098. The examiner can normally be reached on M-F 9-5:30.
